

LIST OF CODEX SPECIFICATIONS FOR FOOD ADDITIVES

CAC/MISC 6

INTRODUCTION

The following two tables list all of the specifications for food additives and flavouring agents adopted by reference by the Commission as well as their initial year of adoption and years of subsequent adoptions of revisions. Years in brackets indicate adoption of revised limits for arsenic and heavy metals, only; these limits supersede those in the full specification monograph adopted in an earlier-cited year. Those substances recognized as having both flavouring and non-flavouring functionality are listed in both tables. In some instances, the year of adoption of the specification for the flavouring agent will differ from the year of adoption of the specification for the non-flavour application.

The Specifications have been prepared by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) and have been published in the FAO JECFA Monographs 1 (2005), Combined Compendium of Food Additive Specifications (all current specifications monographs from the 1st to 65th meeting of JECFA) and in later publications in the same series¹. The specifications monographs are also accessible on the JECFA website: <http://www.fao.org/ag/agn/jecfa-additives/search.html?lang=en>.

Specifications for flavouring agents are not included in the Combined Compendium of Food Additive Specifications, FAO JECFA Monographs 1 (2005), with the exception of those few having an additional non-flavour technological function. All current specifications prepared through the 65th meeting of JECFA for food additives used exclusively as flavouring agents have been published in FAO Food and Nutrition Paper 52 and its addenda 1–13. Specifications for food additives used exclusively as flavouring agents which have been prepared subsequent to JECFA's 65th meeting are being published in the FAO JECFA monographs series. They are also available in another online searchable database at the JECFA website of FAO: <http://www.fao.org/ag/agn/jecfa-flav/search.html?lang=en>.
